

ViiV HEALTHCARE'S AMP GRANTS: FUELING GRASSROOTS CHANGE AND LEADERS

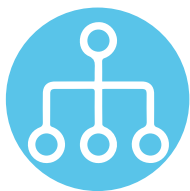

ViiV Healthcare's **Positive Action AMP Grant** initiative funds community-led organizations to incubate and support emerging efforts to disrupt disparities in HIV care. These three-year incubators serve as resource hubs and think tanks for leaders, networks and projects, providing micro-grants, mentorship and other network supports.

ViiV Healthcare's AMP Grant initiative is a new way to resource grassroots networks and projects that typically can't access funding by supporting community organizations to make micro-grants. These resources fund emerging linkage to care, advocacy and network-building projects across the United States as they work to expand outreach and engagement in prevention and care.

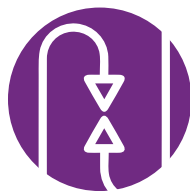

AMP Grant Leads are organizations that have a deep knowledge of community needs and strong relationships with emerging and frontline leaders. They develop calls for proposals and identify top talent to redistribute funding. **AMP Grant Micro-Grantees** gain access to funds that were not previously accessible through the re-granting process. They develop their skills through coaching and technical assistance, build connections to a larger network and implement innovative projects.

POSITIVE ACTION

ViiV Healthcare was established to take an innovative approach to the challenge of HIV—and we do. It's who we are. An innovative approach means we go beyond developing new medicines. We seek insights to better understand the unmet needs of people living with HIV. We connect individuals and communities to help drive solutions focused on providing the same standard of care for all people living with HIV. We develop and support community programs that focus on HIV prevention, care and treatment. The voice of the HIV community informs everything we do. As the only company solely focused on HIV, we think differently, act differently and connect differently to improve the lives and outcomes for all people affected by HIV.
